ABOUT US

The HP Machine represents more than just a company; it embodies the realization of a dream born from a profound understanding of the national market's needs. Drawing upon years of experience in multinational corporations, we identified existing gaps and took proactive steps to address them.

Our journey commenced in 2011 with a vision to deliver tailor-made solutions in the realm of industrial automation. Specializing in the refurbishment of packaging machinery, provision of spare parts, and the creation of cutting-edge collaborative robotics systems, we have embraced collaborative robots, or cobots, as integral to our approach. These cobots empower our customers to stay ahead in the Industry 4.0 landscape.

Recognizing the imperative of adapting to the automation era's demands, particularly in end-of-line production, we are dedicated to developing solutions that resonate with this forward-looking vision.

Fueled by a fervent passion for innovation, we offer not only equipment and systems but also an unwavering commitment to ensuring customer satisfaction.

At HP Machine, we navigate the realm of industrial automation and cobots daily, driven by a shared dedication to excellence.
